

Toilet Alarm

for Omnicare & Care2 EVC systems

The Baldwin Boxall DTAKIT is a fully compliant BS8300:2009 system for the OmniCare and CARE2 EVC systems.

Additional components can be added to the system to provide an 'assistance call' style system.

THE DISABLED TOILET ALARM KIT:

Each Kit Contains:

- Pull switch - ceiling mounted pull switch (with two fully compliant 'G' pulls).
- Reset point - reset button with powerful LED and sounder.
- Light/sounder - overdoor triangular lens with integral sounder to attract attention.
- WC sign - self adhesive, vinyl, disabled toilet sign.

General Product Information:

- Call acknowledge feature - both audible and visual - when a call is accepted; reassuring the caller that help is on the way.
- Up to two toilet alarm kits can be connected to one point on the EVC control panel.
- Toilet alarms are monitored and battery-backed via the EVC system. There is also an automatic 'self test' facility which ensures that all sounders and LEDs are fully operational.
- The kit is available with either a white or stainless steel finish. Alternatively, the parts can be purchased separately to enable a combination of finishes to be applied if required.
- The kits are connected to the EVC system as follows:
 - Omnicare - via a repeater unit (BVOCRIF) on the loop.
 - CARE2 - directly to the control console.

OTHER PRODUCTS AVAILABLE:

Assistance Call - DTAKIT Call/Reset Point Options:

- Additional call, reset or call & reset points can be added to the DTAKIT & DTASKIT*.
- Each 'call point', 'reset point' or 'call/reset point' is available in either a white or stainless steel finish - providing amazing flexibility and choice.
- As a minimum each 'call zone' must comprise of an overdoor light, a call point and a reset point (or an overdoor light and a call/reset point).
- Any number of call and reset points can be added to a single overdoor light*. (Only one overdoor light can be included per call zone).

ASSISTANCE CALL OPTIONS

4-Way Toilet Alarm Control Panel:

The DTAKITs can also be used with our 4-way control panel. For more information please refer to separate leaflet.

* Adding additional components to the DTAKIT may result in non-compliance to BS8300:2009. We recommend referral to the Standard for clarification. Dependent upon system layout, some components may be unmonitored.

Specifications:

	Alarm Type	Cable Requirements	Dimensions mm WxHxD	Back Box Requirements (not supplied)
